

SIH 26016 - Evidence-Backed Acquisition Control Plane

Complete system architecture and end-to-end workflow - PPT-ready A3 landscape poster

SIH 26016 - Federated Evidence-Backed Acquisition Architecture

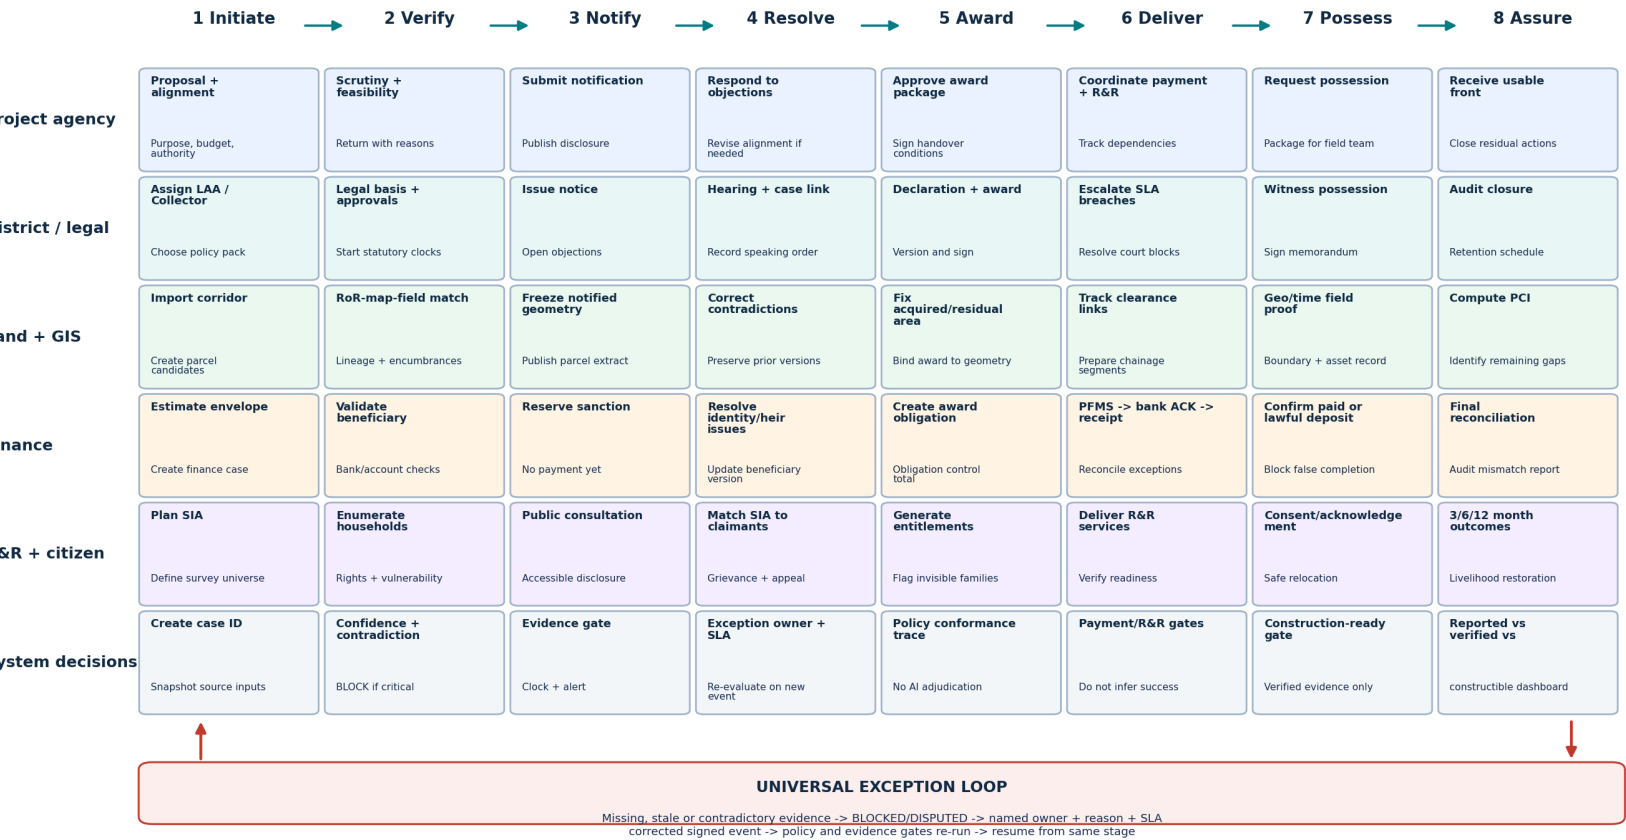

State systems remain authoritative. The platform verifies evidence, coordinates work, and computes constructible readiness.

CHANNELS AND DECISION SURFACES

End-to-End Land Acquisition Workflow - Parallel Tracks and Evidence Gates

Project, parcel, payment and family states advance independently. Project progress is derived; it is never a single manually selected status.

Core metric: verified continuous constructible frontage - not raw land acquired
